

Improve your chances of publication

About Enago

- Assisting research authors **meet publication success**
- **Strong reach amongst individual researchers (B2C) & Universities (B2B)**
- **Leaders** in Japan, Korea and amongst **top 3 players** globally.
- Provides Language editing & Publication Support Services
- A preferred partner for leading publishers, societies and universities worldwide

Corporate Memberships

WILEY

Scientific Editing & Formatting

**Author
Education Services**

- 1 Quality-conscious ESL authors
- 2 The Enago Promise
- 3 Reasonably priced

2 Editors edit the manuscript covering all aspects of editing

Ingredients of Editing

Language and Grammar Check

- Language Check
- Grammar Check
- Punctuation check

Style and Consistency

- Writing style check
- References check
- Figures and Tables

Technical Accuracy

After Sales Support

- Editor Q&A for 365 days

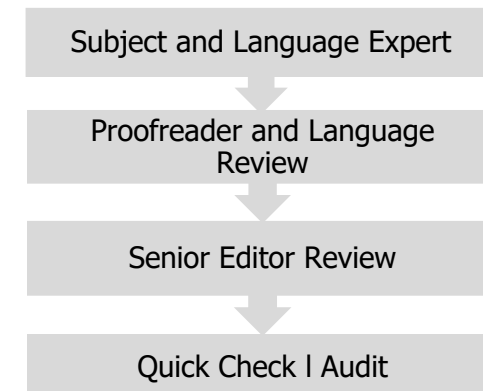

Free Add-On

- Word Count Reduction
- Journal Formatting
- Certificate of Editing
- Academy Resources
- Manuscript Rate card (MRC)

Available only with Enago

- “Two-Editor” System
- Native speaking Editor
- Specialized Subject Area Matching

Editorial Workflow

Substantive Editing Service

- 1 Top-tier premium service
- 2 The Enago Promise
- 3 Highest skilled editors

2 Editors edit the manuscript covering all aspects of editing

English Editing Samples

Listed below are few excerpts of papers edited under our [Substantive Editing](#) and [Copy editing](#) services. These samples illustrate the differences among the three services, mainly in terms of the extent of intervention and output quality. The samples also present a clear idea about our unique innovation: tags and remarks. To know more and decide which service best suits your manuscript, refer to our [service checkpoints](#).

Revised Manuscript

For accurate ~~measurement of~~ QT interval ~~measurement~~, the relationship between QT and ~~the~~ R–R intervals should be ~~reproducible~~ repeatable, particularly in cases with ~~This~~ an issue is important when the heart rate of <50 bpm and >120 bpm. **1** Moreover, ~~Accurate measurement of the QT interval is also important in~~ athletes and children who have a significant beat-to-beat variability of the R–R interval may need. ~~In such cases~~, prolonged and numerous recordings ~~for accuracy~~ may be necessary. ~~The longest~~ Longest QT interval is generally observed in the right precordial leads.

Long QT syndrome (LQTS) is a congenital disorder ~~characterized by~~, ~~which shows~~ a protracted QT interval on the electrocardiogram ECG. ~~This condition predisposes patients to the development of~~ ~~This condition influences~~ ventricular ~~tachyarrhythmia~~ tachyarrhythmias to develop in people, which may lead to syncope, cardiac arrest, or sudden cardiac death. Additionally ~~In LQTS~~, QT prolongation can lead to polymorphic ventricular tachycardia, ~~which is~~ also referred to as torsade de pointes, ~~which in~~ ~~This condition~~ itself may result in ~~lead to~~ ventricular fibrillation and sudden cardiac death.

~~Considerably~~, ~~torsade~~ Torsade de pointes is ~~widely thought to be~~ triggered by calcium channel reactivation, ~~a~~ delayed sodium current reactivation, or a diminished outward potassium current that results in early afterdepolarization (EAD). This leads to enhanced transmural dispersion of repolarization (TDR) **2** and is usually associated with a prolonged QT interval. TDR serves as a functional reentry background to maintain torsade de pointes. ~~TDR~~ It provides a reentry background ~~for reentry~~ and increases the ~~risk likelihood~~ of EAD, the trigger for torsade de pointes, by extending the ~~extension of~~ the time window for calcium channels to remain open. Any ~~additional further~~ condition that accelerates ~~ing~~ ~~the reactivation of~~ calcium channels reactivation (e.g., increased sympathetic tone); increases the risk of EAD.

Prolonged recovery from excitation increases the probability ~~chance~~ of ~~dispersion of~~ refractoriness dispersion; when some parts of the **3** myocardium are refractory to subsequent depolarization. From a physiological viewpoint, dispersion occurs with repolarization between ~~of~~ the three layers of the heart; and the repolarization phase tends to be

You can download the samples for Copy Editing and Substantive editing from this section. You can also download the "Editor Message" file, cover letter, and the Manuscript rate card for your reference.

FAQs

- Q.** I like your editing quality; however, I don't want the editing notations and want a clean edited copy.
 - A.** Enago delivers manuscripts with track changes. If you want the final manuscript with changes accepted, you can easily do this by "accepting changes" from the "review" tab of MS-Word. Alternately, you may request us to send you a clean copy without notations while placing the order. We will deliver a copy without any editing notations.
- Q.** I chose Copy Editing service without a cover letter, but I would like to opt for the cover letter writing service.
 - A.** Under the Substantive Editing service, the assigned editor creates a cover letter for free, but for Copy Editing Service, the cover letter comes at an additional fee. You can opt for the cover letter from [here](#).

Published Papers

At Enago, our mission is to get your papers published in your desired journals by offering the following:

- all levels of [English editing](#) assistance
- support services at every [step of publication](#)

Below is a list of some of our clients who have consented to share their achievements on our website. We congratulate all of them for their exemplary achievement.

Medical/Clinical Sciences

Publisher	Journal Details	I. F.	Paper Title	Author
Lippincott Williams & Wilkins Ltd.	Annals of Plastic Surgery	1.377	Clinical Importance and Risk Factors for Postoperative Late-Onset Pneumonia After Major Oral Cancer Surgery With Microvascular Reconstruction	Hsieh Yu-Hsuan
Lippincott Williams & Wilkins Ltd.	Annals of Plastic Surgery	1.377	Prognostic Factors and Clinical Outcomes of Clinical Node-Negative Cutaneous Malignant Melanoma Patients: An Asian Single Institute Study	Chen Yi-Fan
Marcel Dekker Inc.	Renal Failure	1.532	Serum osteoprotegerin level is positively associated with peripheral artery disease in patients with peritoneal dialysis	Wang Chih-Hsien
Lippincott Williams & Wilkins Ltd.	Medicine	2.031	Whether productive authors using the national health insurance database also achieve higher individual research metrics: A bibliometric study	Kuo Shu-Chun
Elsevier Limited	Parasite Epidemiology and Control	1.429	Epidemiological and clinical profiles of cutaneous leishmaniasis diagnosed in Casablanca (Morocco) suggest a possible introduction of Leishmania tropica to urban areas	Riyad Myriam
